PROFILE

Second-year BSc Computer Science student at York St John University, looking for a summer internship in cloud engineering or cloud security. I learn by building and writing up what broke: I have two live sites on AWS, one with automated deploys through GitHub Actions, and public write-ups of both on GitHub. Working towards the AWS Certified Cloud Practitioner exam.

EDUCATION

BSc (Hons) Computer Science · York St John University 2025 – 2028 (expected)

PROJECTS

Cloud Resume Challenge · CV website on AWS Aug – Oct 2026

github.com/ReejanPariyar/cloud-resume-challenge

S3 CloudFront Lambda DynamoDB IAM Terraform GitHub Actions pytest

- Built a CV website on S3 and CloudFront, with a visitor counter using a Python Lambda function and a DynamoDB table. The function's IAM role can only update that one table.
- Built it by hand in the AWS CLI and console first to understand each part, then wrote the S3 and CloudFront setup in Terraform.
- Automated deploys with GitHub Actions signing in to AWS through OIDC (no stored keys), and wrote pytest tests that run on every change to the Lambda function.
- Fixed a CloudFront 504 (wrong origin protocol), a Lambda URL 403 (missing permission) and stale cached pages (cache invalidation).

Rudra Travels website on AWS Sep 2026 – present

Family member's trekking company, Kathmandu.

rudra-travels.com · github.com/ReejanPariyar/rudra-travels-aws

S3 CloudFront ACM Route 53 Terraform AWS CLI

- Hosted the live site on AWS: private S3 bucket behind CloudFront, ACM certificate, DNS on Route 53. Built with AI-assisted guidance.
- Provisioned it with Terraform, including a full teardown and rebuild, and deploy updates with an AWS CLI script (S3 sync and CloudFront invalidation).
- Diagnosed DNS propagation errors and a lost Terraform state file: read the plan, did not apply, and avoided duplicating live infrastructure.
- Published a write-up on GitHub (architecture, problems and fixes, reusable Terraform template), scanning for secrets before pushing.

EXPERIENCE

Prep Chef · Cresci Pizzeria, York May 2026 – present

- Prepare ingredients in a busy kitchen, part-time (Mon–Thu, some Sundays) alongside full-time study.

Earlier: front of house at Bengal Brasserie; kitchen porter and prep at Guy Fawkes Inn.

SKILLS

Cloud and DevOps —

AWS S3 CloudFront Route 53 ACM IAM Lambda DynamoDB Terraform AWS CLI

GitHub Actions Docker (basics)

Programming and tools —

Python boto3 pytest SQL HTML/CSS PHP C Git Linux

CERTIFICATIONS

AWS Certified Cloud Practitioner — in progress

LANGUAGES

English (IELTS 7.0), Nepali (native), Hindi (conversational)
